

# Windows Live Movie Maker Adding Voice-over and Music Tracks

To add a previously-recorded voice-over track, or background music:

1. Under the Home tab, click 'Add Music'
2. Choose the audio track to be added.  
The audio track will then show up just above the video track in the editing window.

3. Click the 'Music Tools' tab at the top of the screen

4. Place the cursor at the desired point in the movie and then choose the various settings below to edit the imported audio track(s):  
Note: audio tracks show up above video tracks

- A. Music Volume
- B. Fade in/Fade out
- C. Split
- D. Set Start / End points
